

p. 172 Moon Phases

History → Used to mark events,
special holidays in Jewish/
Muslim calendar

Moon Phases The cycle of the
8 stages of the
illuminated side of
the moon.

Right* **Waxing** When the moon appears
to grow, more of the moon
is illuminated.

Left* **Waning** When the moon appears
to shrink, less of the
moon is illuminated.

Crescent Less than $\frac{1}{2}$ of the
moon is illuminated

Quarter $\frac{1}{2}$ of the moon is
illuminated

Gibbous more than $\frac{1}{2}$ of the
moon is illuminated
